	Factories other than Food, etc. Factories -	
10.	Total, Six States - January, 1963 to February, 1964	15
11.	States - January, 1963 to February, 1964	15
12.	Industry Groups, Five Mainland States - January, 1963 to February, 1964	16
	<u>III. REGISTERED UNEMPLOYED AND NUMBER ON BENEFIT</u>	
13.	Persons Registered for Employment with Commonwealth Employment Service - June, 1958 to February, 1964	17
14.	Number receiving Unemployment Benefit - June, 1958 to February, 1964	18

# I. WAGE AND SALARY EARNERS IN EMPLOYMENT

The series contained in this section are based on comprehensive data (referred to herein as "benchmarks") derived for the purpose from the Population Censuses of June, 1954 and June, 1961.

2. Figures for periods between and subsequent to the two benchmark points of time are estimates obtained from three main sources, namely, (a) current Pay-roll Tax returns; (b) current returns from Government bodies; and (c) some other direct current records of employment (e.g. for hospitals). Data from these sources have been supplemented by estimates of the changes in number of wage and salary earners not covered by the foregoing collections.

3. Figures for current months are subject to revision. As they become available, particulars of employment obtained from other collections, notably the annual factory census and the censuses and sample surveys of retail establishments, are used to check, and, where desirable, to revise estimates in relevant sections. The work force survey now being developed will supply an additional check for future estimates.

4. The benchmark figures are derived from particulars recorded for individuals on population census schedules. The estimated monthly figures are derived mainly from reports supplied by employers, relating to enterprises or establishments. These two sources differ in some cases in scope and in reporting of industry; however, the industry dissection of the benchmark total has been adjusted, as nearly as may be, to an enterprise/establishment reporting basis. The industry classification used throughout the series is that of the Population Census of June, 1961.

5. Pay-roll Tax returns are lodged at present by all employers paying more than £200 a week in wages (other than certain Commonwealth Government bodies, religious and benevolent institutions, public hospitals and other similar organizations specifically exempted under the Pay-roll Tax Assessment Act 1941-1962). At June, 1954 this Act required employers paying wages of more than £80 a week to lodge returns. The exemption limit was raised to £120 a week from 1st September, 1954 and to the present level of £200 a week as from 1st September, 1957.

6. Employees in rural industry and in private domestic service are not included in the estimates, because of the inadequacy of current data.

7. The terms "Employment", "Number Employed", "Employees" and "Wage Earners" used herein are synonymous with, and relate to, "Wage and Salary Earners" on pay-rolls or "in employment" in the latter part of each month as distinct from numbers of employees actually working on a specific date. They include some persons working part-time.

8. The prime purpose of this series is to measure, as nearly as may be with available data, current monthly trends in employment in the defined field. The estimates are subject to less reliability for longer term measurement. However, the new series (with benchmarks at June, 1954 and June, 1961) incorporate revisions from June, 1954.

9. The dissection of this series into "Private" and "Government" has now been completed, and particulars are shown in Tables 6 and 7 of this bulletin.

(a) See note (a) to table on opposite page. Excludes State and local government employees engaged in rural industry or in private homes as employees of government emergency housekeeper services (3.7 thousand persons in December, 1963). Also excludes defence forces (see Table 1 on page 3). (b) Includes semi-government bodies.

## II. EMPLOYMENT IN LARGER PRIVATE FACTORIES

The employment figures in this section are obtained by means of a survey of larger private factories undertaken by joint arrangement between the Department of Labour and National Service and this Bureau. The survey covers practically all private factories with 100 or more employees and a large section of those with between 50 and 100 employees.

The results of the survey give an earlier indication of current monthly trends in private factory employment than is available from any other source, and the trends in employment in these larger private factories are broadly consonant with those shown by the subsequent estimates of total private factory employment.

Employers co-operating in the survey are asked to supply the number of employees on their factory pay-roll as at the last pay-day in the month. All persons engaged in the factory or on the factory office staff, providing their employment is directly related to manufacture, are to be included, but selling and distribution staff are to be excluded.

Employment in factories in the industry group "food, drink and tobacco" is subject to considerable seasonal fluctuation. In order to isolate the effect of such seasonal movements, separate tables have been included in this section to show the movement in employment in factories other than food, drink and tobacco factories.

The table showing employment in industrial groups includes particulars for only the five mainland States. Figures for Tasmania cannot be included because of the possibility of disclosing individual factory particulars.

In order to keep the survey as representative as possible, the list of factories included is revised at the beginning of each year. When comparing employment figures for different periods it should be noted that at any point of time a continuous monthly series on a uniform basis is available only from January of the previous year.
